Date of birth: 10/03/2002 | **Nationality:** Pakistani | **Sex:** Male | **Phone:** (+92) 3038772575 (Mobile) | **Email:** waqmeh456@gmail.com | **LinkedIn:** www.linkedin.com/in/waqas38 |

Address: E-11/2 Street 5, Islamabad, Pakistan (Work)

ABOUT MYSELF

I am a dedicated Frontend Web Developer with expertise in HTML5, CSS3, Bootstrap, JavaScript, and React. I create responsive, dynamic, and engaging user interfaces, leveraging skills in Tailwind CSS, Redux Toolkit, and REST API integration for robust solutions. Skilled in problem-solving, I quickly enhance and maintain websites, using Git and GitHub for smooth version control and collaboration. Committed to delivering high-quality code, I consistently strive to exceed client expectations.

WORK EXPERIENCE

21/08/2023 – 15/08/2024 Islamabad, Pakistan
REACT DEVELOPER - ONSITE BINGTECHS SOLUTIONS

- Led the development and architecture of complex web applications using React, Redux, and modern JavaScript, ensuring scalability and maintainability.
- Implemented advanced state management techniques, optimizing data flow and enhancing the performance of high-traffic applications.
- Mentored junior developers, conducted code reviews, and established best practices to maintain high code quality and consistency across projects.
- Collaborated with cross-functional teams, including designers and backend developers, to deliver seamless, integrated user experiences.
- Spearheaded the integration of RESTful APIs and third-party services, ensuring robust and efficient communication between front-end and back-end systems.

10/01/2023 – CURRENT Peshawar, Pakistan
FRONTEND DEVELOPER - REMOTE WORLDWEBTREE

- Developed and maintained responsive web applications using HTML, CSS, JavaScript, and React, ensuring a seamless user experience across multiple devices
- Collaborated with UX/UI designers to translate wireframes and mockups into interactive, high-quality web components.
- Optimized front-end performance through code refactoring, lazy loading, and effective use of caching techniques, resulting in faster load times.
- Integrated RESTful APIs with frontend components, ensuring efficient data flow and dynamic content rendering.
- Conducted thorough testing and debugging to ensure cross-browser compatibility and adherence to web standards.

EDUCATION AND TRAINING

16/07/2020 – 16/07/2024 Peshawar, Pakistan
SOFTWARE ENGINEER Islamia College University Peshawar

DIGITAL SKILLS

HTML5 | CSS3 | Bootstrap | JavaScript | Tailwind CSS | React | Redux Toolkit | Github | Postman | Git

PROJECTS

01/04/2024 – 28/07/2024
Wizalot

- Led the frontend development for "Wizalot," an extensive e-commerce platform with complex features similar to Amazon.
- Designed and integrated a dynamic and responsive multivendor marketplace, facilitating seamless product listings, sales management, and auction bidding.
- Created a user-friendly vendor dashboard, comprehensive banner and mall registration interfaces, and an efficient admin dashboard for streamlined management.
- Developed an intuitive customer support dashboard to enhance user experience and provide effective support solutions.
- Implemented sophisticated ad placement mechanisms and a robust affiliate program to drive user engagement and revenue growth, ensuring a smooth and visually appealing frontend experience.

05/01/2024 – 10/02/2024

Overseas Chitralis Association

- Write hereOverseas Chitralis Association, a platform designed to provide financial assistance to members of the Chitral community living abroad.
- The website enables community members to join the association and seek help in times of need, fostering a supportive and connected community.
- Enables members to request financial assistance through a streamlined application process.
- Offers resources and information to assist members in various aspects of their lives abroad.
- Features analytics and reporting tools to monitor engagement and support activities.

22/10/2023 – 13/12/2023

Code-Brussels

- Multivendor e-commerce platform that empowers users to effortlessly create and manage their own stores for selling products, alongside the platform owner's store.
- This platform fosters a diverse and competitive online marketplace, enabling seamless interactions between vendors and customers.
- Advanced search and filter functionalities help customers find products quickly and easily.
- Offers a smooth and enjoyable shopping experience with features like wish lists, product reviews, and order tracking.
- Built with Node.js and MongoDB to handle high traffic volumes and large amounts of data efficiently.
- Integrated with Stripe Payment API for secure and efficient payment processing.
